Introduction

This document contains notes about the Comodo Dragon Platform January 2022 release. The release schedule will be as follows:

- US Region and agents
 - The release will start on 19th January 2022 Wednesday at 1 AM EDT
- EU Region and agents
 - The release will start on 20th January 2022 Thursday at 5 AM GMT

The release is expected to take 30 minutes to deploy, during that time the platform will be under maintenance mode, where you may observe minor glitches. If you observe any issues, please feel free to share with us.

Dragon Enterprise & Platform

Bug-Fixes

- Fixed the issue of wrong sub-menu tab appearance in UI.
- Fixed the issue of date format inconsistency.

Cyber Security

New Features

- **External Device Control for MacOS**
 - With this feature, all matched external devices connected to the Mac can be blocked or allowed by partial name / ID.

Comodo Client Security & EDR

New Features

- **Support for Apple M1 chipset**
 - From now on, Security agent for MacOS is able to run on M1 chipset with all capabilities. For Security agent for MacOS to run properly on M1 chipset, Apple Rosetta application must be installed for once.

Bug-Fixes

- Fixed the issue of 'View Logs' section crashing when clicking 'Configuration Changes' in View Logs Section on MacOS 11.5/12.1

Device Management & Licensing

New Features

- **Support for Apple M1 chipset**
 - From now on, Communication agent for MacOS is able to run on M1 chipset with all capabilities. For Remote Control to run properly on M1 chipset, Apple Rosetta application must be installed for once.

- Fixed the issue that "Comodo Client Security Report Issues" would include device duplicates if the device is a member of several device groups.
- Fixed the issue that the Secure Internet Gateway module is unable to be activated for the Dragon Enterprise portal.
- The UI issue of clipping the device name information in "Execution Log of Procedures" has been fixed.

SOC as a Platform (SOCaaS)

Bug-Fixes

- Fixed the issue of not showing failed O365 login events on SOCaaS.

Secure Internet Gateway

Bug-Fixes

- Fixed typo in the Secure Internet Gateway widget on UI.

ABOUT US

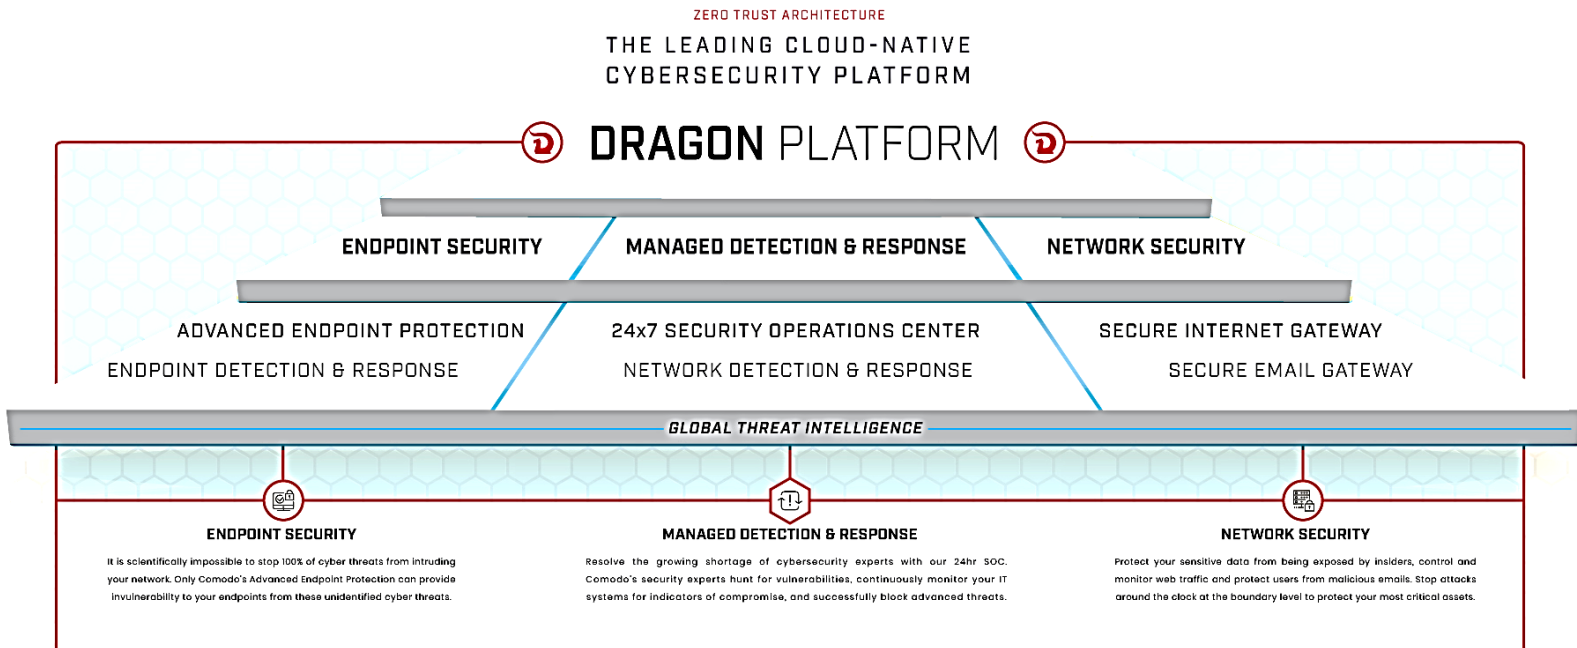

Comodo is the world's leader of next-generation open-source cybersecurity, with the industry's most disruptive innovations.

We help customers stop breaches with groundbreaking isolation technology that neutralizes ransomware, malware and cyber-attacks. Our complete cloud-native framework delivers a zero-trust architecture with active breach protection for the most comprehensive defense against zero-day threats. Comodo's cybersecurity products maximize intelligent sharing between every component of the platform, therefore providing superior security. We are the only company that analyzes and gives a trusted verdict for 100% of files on a network.

ACTIVE BREACH PROTECTION FOR YOUR BUSINESS

Comodo provides Active Breach Protection in a single platform. No one can stop 100% of threats from entering their network so Comodo takes a different approach to prevent breaches.
