Agents:
Effective on Thursday, September 21st, 2023, at 01:00 AM EDT

XCITIUM ENTERPRISE & PLATFORM

IMPROVEMENTS

- The Enable Managed Protection option is now set as disabled and unchecked by default under device enrollment.
- The data storage unit (in KBs) within the 'Script Analysis' section is now added.

BUG - FIXES

- Fixed an issue of undisplayed Data Loss Prevention (DLP) discovery logs in the Endpoint Manager (EM) portal and corrected the action value in Data Loss Prevention (DLP) monitoring logs.
- Fixed missing newly detected script items in the Endpoint Manager portal.

XCITIUM CLIENT SECURITY – WINDOWS

BUG - FIXES

- Fixed an issue of the endpoint communications agent cmdagent.exe file crashing in the 12.10.0.8697 version of a Windows 10 endpoint.
- Fixed an issue with the Xcitium Client Security (XCS) Autorun Scans & Monitoring feature incorrectly detecting an .lnk file itself instead of the target object.
- Fixed an issue of Internet Explorer not starting as expected via its Widget on Windows 11.
- Fixed an issue of a long-duration loading of the log-in after AV is enabled.
- Fixed an issue of "Terminate and Disable" boot protection monitoring to properly remove files instead of removing WMI autorun entries.
- Fixed an issue of "Terminate and Disable" boot protection scanning to properly remove files instead of removing WMI autorun entries.
- Fixed an issue of boot scanning not terminating embedded code autorun entries as expected.
- Repaired the process for dumping crash logs on Windows 10 x64 hosts in the event of a cmdagent.exe crash.
- Fixed an issue of the autorun process getting quarantined after an operating system reboot and kept in quarantine even if the autorun configuration is disabled.
- Fixed an issue of the Xcitium Client Security (XCS) 12.16 crashing when the Scan Results window was opened and closed during a boot scan.
- Fixed an issue with the chained launch of CMD when a PowerShell operation lags or doesn't resolve.
- Fixed an issue of Xcitium Client Security (XCS) detecting a new network zone after each login if automatic zone creation is disabled.

DEVICE MANAGEMENT

IMPROVEMENTS

- Ability to turn chatting on or off under profile management.
- Ability to see Windows device event viewer with the new remote tool.

BUG - FIXES

- Fixed an issue of online devices generating an alert even though an offline monitor rule was assigned.

AGENT REMOVAL TOOL – WINDOWS

BUG - FIXES

- Fixed an issue with the Removal tool uninstalling Xcitium Client Security (XCS) via the portal command.
