## Introduction

---

This document contains notes about the Comodo Dragon Platform April 2022 release. The release schedule will be as follows:

- US Region
  - The release will start on 13th April 2022 Wednesday at 1 AM EDT
- EU Region and agents
  - The release will start on 14th April 2022 Thursday at 5 AM GMT

The release is expected to take 30 minutes to deploy, during that time the platform will be under maintenance mode, where you may observe minor glitches. If you observe any issues, please feel free to share with us.

## Dragon Enterprise & Platform

---

### New Features

- **Editable Policy and Suppression Rules**
  - From now on, the company-wide alert policy and suppression rules for alerts can be set. So that, new alerts can be defined, and any apps or files can be excluded to prevent generating alerts.

### Improvements

- **Renaming Endpoint Security Sections**
  - Endpoint Security section under Dragon Enterprise Platform has been entirely renamed with a more comprehensive menu structure.
- **Dragon Enterprise Availability on Europe Region**
  - From now on, Dragon Enterprise Platform will be fully available on Europe region.

[platform.comodo.com](http://platform.comodo.com)

- **Full Visibility on all Endpoint Detection and Response Plans**
  - From now on, all Endpoint Detection and Response plans (including free) will have full visibility instead of unknown visibility.

## Bug-Fixes

- Fixed the menu display issue in Dragon Enterprise for Firefox browser.
- Fixed the issue of not working File Hash search for EDR alerts on Hash View under Alerts.
- Fixed the issue of User Search on the Alert Search page does not work properly.
- The issue of Comodo Client Security events are not shown for devices on Investigate page under Event Search has been fixed.
- Fixed the issue of Website Protection page is not shown occasionally under the SOCaaS menu.
- The issue of displaying the error when searching Alert Related Events on the Event Search page under the Investigate menu has been fixed.
- Fixed the issue of EDR events and alerts are absent on the Dragon Enterprise portal.
- The Malware Detection Charts not displaying issue on Endpoint Dashboard has been fixed.
- Fixed the issue of fields are not shown on the Event Search page.

## Cyber Security

---

### New Features

- **Scan Start Date – End Date Addition for Antivirus Device List Export**
  - When the antivirus device list is exported, the Scan Start Date and Scan End Date are now included.
- **Adding the Containment Run Virtually New Options in Default Profile**
  - From now on, a containment rule in default profiles can be set for "Run Virtually" action to prohibit usage of SMB shared resources and/or not allow access to other processes memory.

[platform.comodo.com](http://platform.comodo.com)

- **Sync/Async LVS Lookup Switch**
  - From now on, LVS Lookup can be configured to be executed synchronously or asynchronously.
- **Showing Embedded Code Detections on a New Section in Application Control**
  - Detected embedded codes are shown on a separate section for easier differentiation from other application detections. Moreover, from now on the content of the detected script can be queried for further analysis.

## Improvements

- **Renaming Security Sub-System Section**
  - Security Sub-System section under Dragon Platform has been entirely renamed with a more comprehensive menu structure.
- **Specific Browser Data Paths Addition to Protected Data Folders**
  - Data folder paths for major web browsers are added under Protected Data Folders section in order to prohibit contained applications to read sensitive browser data. Necessary paths are added for below web browsers.
    - Google Chrome
    - Mozilla Firefox
    - Microsoft Internet Explorer
- **Containment Rule UI Improvements**
  - From now on, criteria details are also being shown under Containment Rules section.

# Device Management & Licensing

---

## New Features

- **Support for Windows Server 2022**
  - From now on, Dragon Platform completely supports Windows Server 2022.
- **Permission Management for Multiple Roles**
  - If more than one role is assigned to a user and/or user group, a combination of the permission set of related roles will be considered when determining the permissions of the user/user group.
- **Ability to Skip Security Warning Popup for a Year**
  - When Comodo Advanced Endpoint Protection is not installed on any endpoint, the security warning popup is being shown, and now users can choose to hide the popup up to one year.
- **Export / Import Functionality for Monitors**
  - Monitors under the Configuration Templates section will be imported and exported collectively.

## Improvements

- **Redesign of the Device List table layout**
  - Device List Table layout under "Device Management" and "Group Management" pages are redesigned to be able to show all texts at the columns and distribute columns properly. Icons are combined at OS and name columns in order to gain more space.

[platform.comodo.com](http://platform.comodo.com)

- **Rename Procedure Scheduler Option**
  - When a procedure is added to a profile with a "once" scheduler option, it will be executed once on an endpoint at a selected time. "Never" is renamed as "Once".

## Bug-Fixes

- Fixed the issue of Enrollment Link not sent.
- Fixed the device doesn't connect to the specified Wi-Fi issue when using the hidden SSID.
- The system performance issue with EDR installed has been fixed.
- Fixed the issue of Beta reports failing on US region.
- The issue of the "Client security is not installed" filter of is not showing the correct number of unprotected endpoints has been fixed.
- Fixed the issue of getting an error when switching back to the master account from the partner portal.
- Fixed the issue of incomplete AV exclusions list in case more than 1 profile associated with macOS device.
- Fixed the issue of restricting access from assigning Role but to give access to create user.
- Fixed the issue "users.rbac.manage" permission hiding "Customer" field in "Create User" popup.

## Secure Email Gateway

---

### Bug-Fixes

- Fixed the issue of SEG having inaccurate audit logs when an admin logs through the Dragon portal.
- Fixed the email bounce back issue.
- Fixed the issue of unable to re-send email from Archive.
- Fixed the issue of more than an hour delay in receiving emails.

### ABOUT US

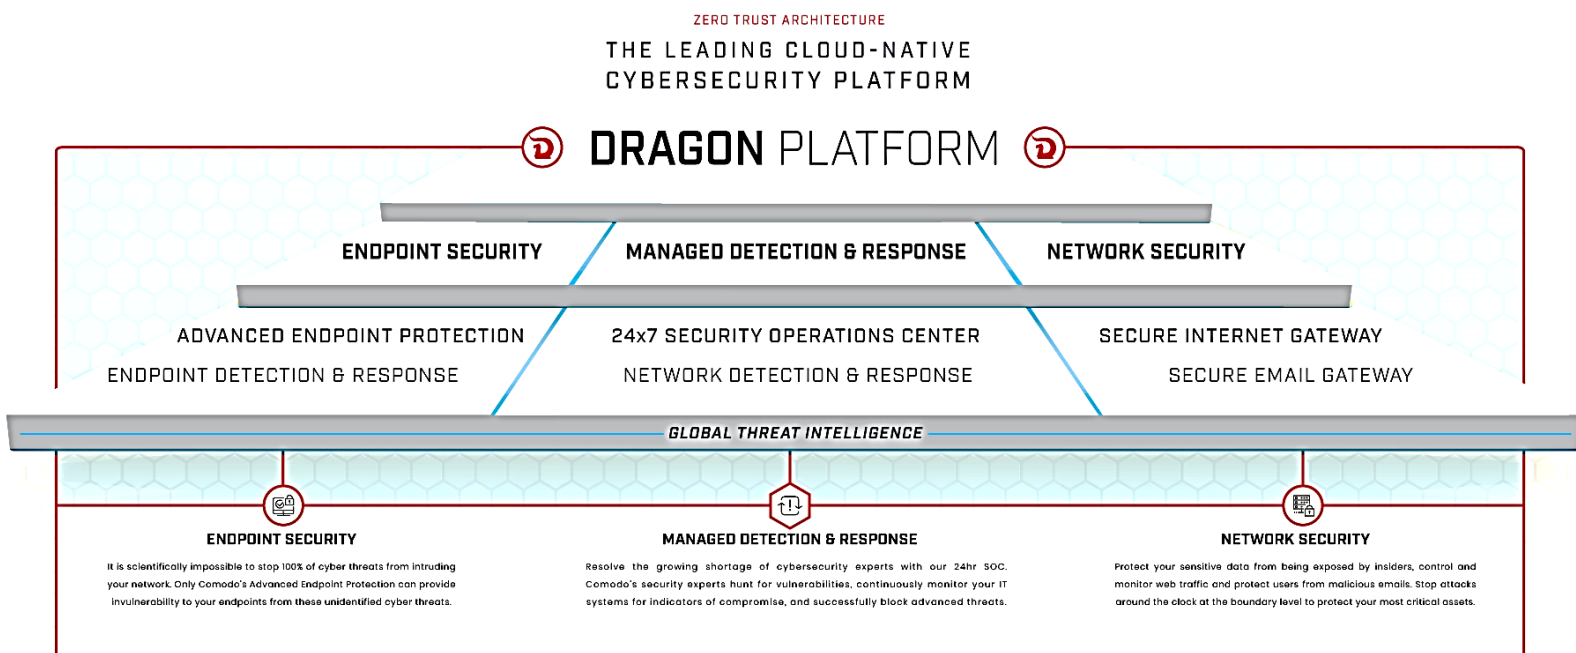

Comodo is the world's leader of next-generation open-source cybersecurity, with the industry's most disruptive innovations.

We help customers stop breaches with groundbreaking isolation technology that neutralizes ransomware, malware and cyber-attacks. Our complete cloud-native framework delivers a zero-trust architecture with active breach protection for the most comprehensive defense against zero-day threats. Comodo's cybersecurity products maximize intelligent sharing between every component of the platform, therefore providing superior security. We are the only company that analyzes and gives a trusted verdict for 100% of files on a network.

## ACTIVE BREACH PROTECTION FOR YOUR BUSINESS

Comodo provides Active Breach Protection in a single platform. No one can stop 100% of threats from entering their network so Comodo takes a different approach to prevent breaches.
