

How to collect extended Windows performance log

1. Install new version of Windows ADK (Assessment and Deployment Toolkit) - **adksetup10.exe** provided with this instruction.
2. Run **Regedit** utility.
3. Go to **HKEY_LOCAL_MACHINE\SYSTEM\CurrentControlSet\Control\Session Manager\Memory Management**
Ensure that value **DisablePagingExecutive** exists and is equal to 1 (change if necessary).
4. Put **Slowlo2.bat** provided with this instruction to the folder
C:\Program Files (x86)\Windows Kits\10\Windows Performance Toolkit.
5. Restart PC.
6. Once PC is started and the issue reproduces, run **cmd** with Administrator privileges.
7. Type command **cd C:\Program Files (x86)\Windows Kits\10\Windows Performance Toolkit**
8. Type command **Slowlo2.bat**. Ensure that no warning/error message is shown. Wait for 30sec – 1 min. Press any key to finish log recording.
9. Find output file **XperfSlowIO.etl** in **C:\Program Files (x86)\Windows Kits\10\Windows Performance Toolkit** and provide it to Comodo support.
