# Introduction

This document contains notes about the Comodo Dragon Platform June 2021 release. The release schedule will be as follows:

US Region -> The release will start on 16th June 2021 Wednesday at 1 AM EDT

EU Region and agents -> The release will start on 17th June 2021 Thursday at 5 AM GMT

The release is expected to take 30 minutes to deploy, during that time the platform will be under maintenance mode, where you may observe minor glitches. If you observe any issues, please feel free to share with us.

# Endpoint Manager

## Endpoint Manager Core

### New Features

- Android 11 KNOX is now fully supported on Endpoint Manager.
- Ubuntu 21.04 is now fully supported on Endpoint Manager.
- Pricing model description is added to Bill Forecast page.

### Improvements

- Google Chrome and Galaxy Store can be managed over Mobile Applications List.

### Bug Fixes

- Fixed the issue of inability to uninstall apps from software inventory.
- Fixed the issue of Comodo Client - Security logs are missing on Endpoint Manager Portal.

- Fixed the issue of the operating system name not being displayed for Android devices on device list export.

## Security

### Improvements

- HIPS option "Create rules for safe applications" is disabled by default for all predefined Endpoint Manager profiles.
- HIPS, Containment and Firewall whitelist rules are added for commonly used apps and actions.
- Web Filtering configurations are excluded on profile processing.
- Block Malicious files rule is added to Containment baseline mode.

### Bugfixes

- Fixed the issue of inability to change file rating under Autoruns through Endpoint Manager Portal.

### Data Loss Prevention

- **Additional Predefined patterns are added.**
  - Turkish Nationality ID Number
  - Credit Card Track Numbers
  - Encrypted Archive
  - Encrypted Document
  - Source Code (C,C++,C#,PHP etc.)

## Remote Monitoring and Management

### Bug Fixes

- Fixed the issue of the procedure failed due to unknown reasons just after it was started.

## Patch Management

### **Bug Fixes**

- Fixed the issue of inability to Uninstall Cumulative updates (KB5000802).

## **Remote Control**

### **New Features**

- **Ability to connect to different devices via RC for users connected to the RDS server who use RC at the same time**

Remote Control now supports multiple users who are connected to the RDS server to connect to different endpoints at the same time using Remote Control

### **Bug Fixes**

- Fixed the issue of accented characters not typed as expected on target device via RC connection.

# **Comodo Client Security**

## **Windows**

### **New Features**

- Infrastructural changes have been made in order to move embedded code detection logs to another tab in Application Control with the ability to query content of the script on demand.

### **Bugfixes**

- Fixed the issue of Comodo Client - Security agent does not detect embedded code in autoruns if interpreter is renamed
- Fixed the issue of Comodo Client - Security full scan is aborted after ~10 minutes.
- Fixed the issue of incorrect process name is added to the registry by Comodo Client - Security.
- Fixed the issue of Web Filtering blocking wrong applications.

- Fixed the issue of cavwp.exe crashing on Terminal Server 2008R2 with the latest Comodo Client - Security 12.0.0.7959.
- Fixed the issue of the keyboard not working after CCS uninstallation.
- Fixed the issue of Comodo Client -Security v.12.7.1.8539 Causing Bugcheck 0xCA on Windows Server 2019.
- Fixed the issue of Comodo Client - Security v.12.6 diagnostic is failing with errors.
